

# How to Draw a Bird

You need: a pencil, an eraser, black pen or marker, paper

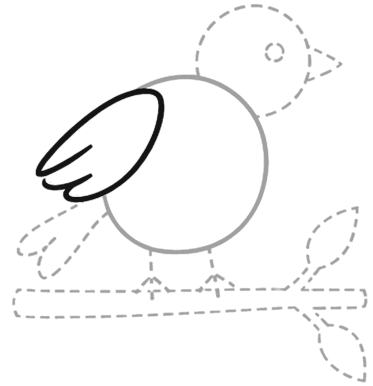

1. Draw the body

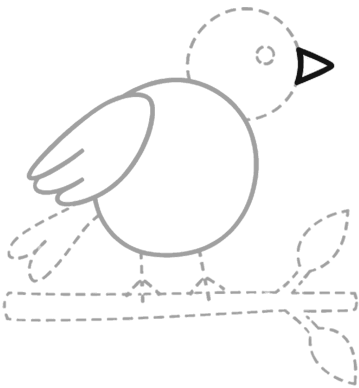

2. Add the head

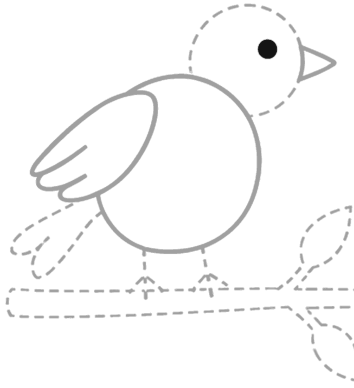

3. Draw the wing

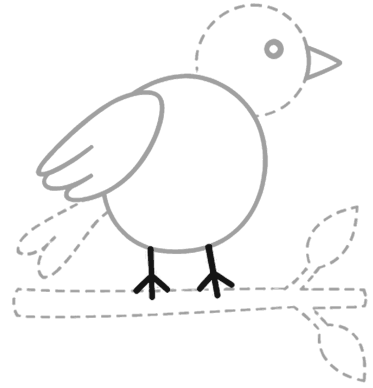

4. Add the beak

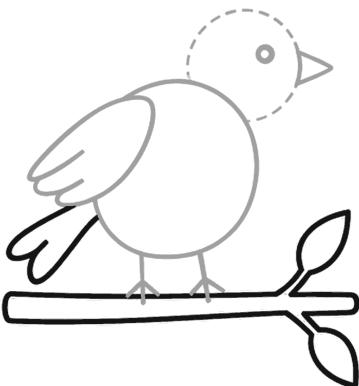

5. Draw the eye

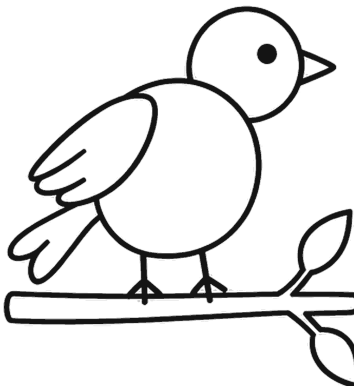

6. Add the legs and feet

7. Draw the tail and branch

8. Finish the bird

# How to Draw a Bird

## 1. Draw the body

Draw a large egg shape for the bird's body in the middle of the page. Make it a little wider at the bottom.

## 2. Add the head

Draw a round head at the top right of the body. Leave a small gap where the head meets the body.

## 3. Draw the wing

On the left side of the body, draw a long curved wing shape. Add two short curved lines at the bottom of the wing for feathers.

## 4. Add the beak

Draw a small pointed triangle for the beak on the right side of the head. Keep the middle of the triangle open.

## 5. Draw the eye

Draw a small filled circle for the eye inside the head. Place it near the top right area of the face.

## 6. Add the legs and feet

Draw two short legs coming down from the body. At the end of each leg, draw three small toes.

## 7. Draw the tail and branch

Draw two long tail feathers at the back of the bird. Then draw the branch underneath, including the fork and two leaves on the right.

## 8. Finish the bird

Go over the body, head, wing, beak, eye, legs, tail, and branch lines you are keeping. Rub out the dotted guide lines to leave the finished bird.

## Tips

- Draw the dotted guide shapes lightly so they are easy to rub out.
- Keep the head round and the body bigger than the head.
- Make the toes small and simple.
