

How to Draw a Fish

You need: a pencil, an eraser, black pen or dark pencil, paper

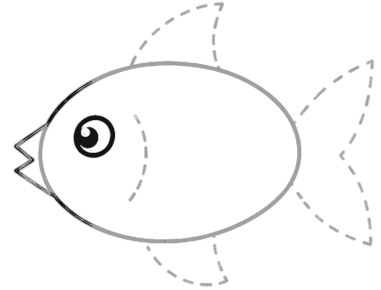

1. Draw the body oval

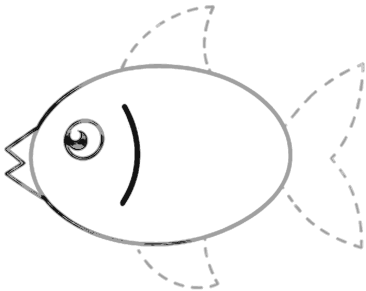

2. Add the mouth

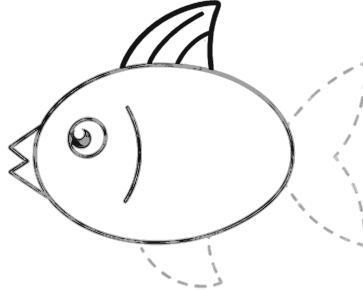

3. Draw the eye

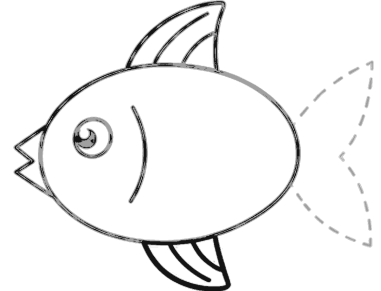

4. Add the gill line

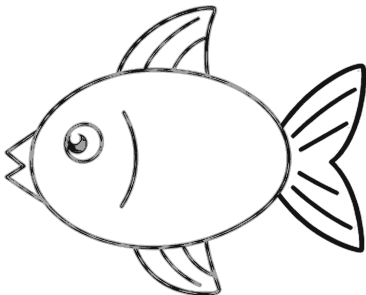

5. Make the top fin

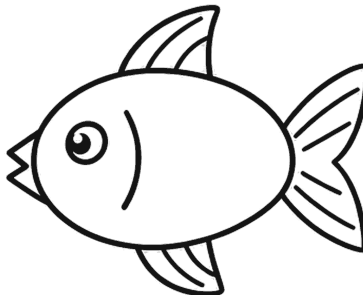

6. Draw the bottom fin

7. Finish the tail

8. Go over and clean up

How to Draw a Fish

1. Draw the body oval

Draw one large oval across the middle for the fish's body.

2. Add the mouth

On the left end of the oval, draw a small zigzag mouth shape that points out from the body.

3. Draw the eye

Inside the dotted eye guide, draw a round eye with a dark middle and a small white shine left uncolored.

4. Add the gill line

Draw one curved line behind the eye, from higher up on the body down toward the belly.

5. Make the top fin

Use the dotted guide on top to draw the top fin. Then add two curved lines inside it.

6. Draw the bottom fin

Use the dotted guide under the body to draw the bottom fin. Add two curved lines inside this fin too.

7. Finish the tail

At the back, draw the tail with two pointed lobes using the dotted guide. Add four short slanted lines inside the tail.

8. Go over and clean up

Go over the body and all the parts you are keeping with darker lines. Rub out the pale dotted guides when you are done.

Tips

- Keep the first oval big and smooth.
- Draw the dotted guide shapes lightly so they are easy to rub out.
- Leave a tiny white spot in the eye to make it look shiny.
