

How to Draw a Pumpkin

You need: a pencil, an eraser, black pen or marker, some paper

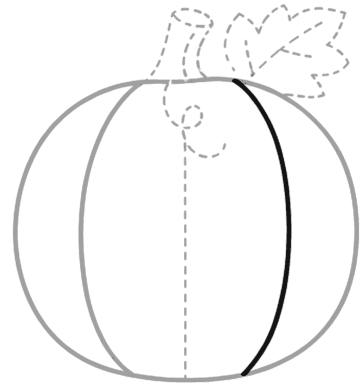

1. Draw the pumpkin shape

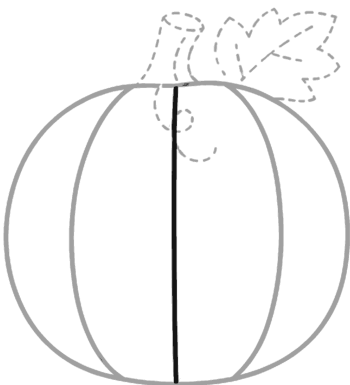

2. Add the left section

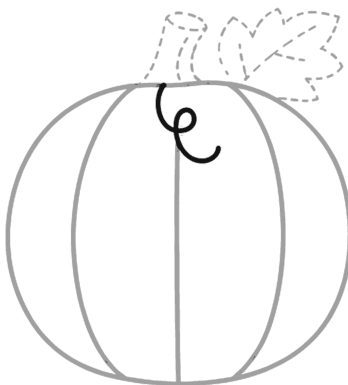

3. Add the right section

4. Draw the middle line

5. Draw the curly vine

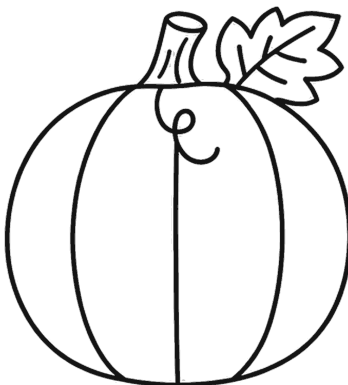

6. Add the stem

7. Draw the leaf

8. Finish and clean up

How to Draw a Pumpkin

1. Draw the pumpkin shape

Draw one big, wide, rounded shape for the pumpkin body. Make the top a little flatter and the bottom gently curved.

2. Add the left section

Draw a long curved line down the left side of the pumpkin. Start near the top and curve it down to the bottom.

3. Add the right section

Draw a matching long curved line on the right side. It runs from the top edge down to the bottom edge of the pumpkin.

4. Draw the middle line

Draw a straight line down the middle of the pumpkin. Start at the top dip and bring it down to the bottom.

5. Draw the curly vine

At the top middle, draw a curly vine that loops once and then curls down and out. Keep the line smooth and rounded.

6. Add the stem

Draw the stem on top of the pumpkin. Make it a tall shape with an oval opening at the top and a few short curved lines inside.

7. Draw the leaf

Draw a leaf on the top right side of the stem. Give it pointed bumps around the edge and draw the leaf veins inside.

8. Finish and clean up

Go over the pumpkin outline and the section lines you are keeping. Then rub out the pale dotted guides to finish your drawing.

Tips

- Use light pressure for the guide shapes so they are easy to rub out.
- Long curved lines look best when you draw them slowly.
- If the two sides are a bit different, your pumpkin will still look natural.
